

Conference toolkit

Inscribed in the tradition of the annual [CGIAR GENDER conferences](#), the international conference “From research to impact: Towards just and resilient agri-food systems” addresses the gender and social inequalities at the heart of food systems. The 2023 conference is co-organized by CGIAR GENDER Impact Platform and Indian Council of Agricultural Research (ICAR). The conference aims to promote the sharing of cutting-edge knowledge on gender and inclusion in food systems to help bridge the gap between research and practice and foster gender-equal and socially inclusive, resilient food systems.

The conference will be an in-person event held in New Delhi, India, from 9-12 October 2023 at ICAR Convention Center. Although some high-level sessions will be live-streamed, it will not be a hybrid.

This campaign and conference promo will run from July to October 2023.
